DIE MAKER NOTES

1. 1:1 sheets are in the separate 1:1 PDF. Produce from the DXF files (layers CUT / SLIT; true arcs and ellipses).
2. Geometry is taken directly from the designer's vector PDF of 2026-10-14 - no re-tracing.
3. CUT (black) = outline, full cut. SLIT (red) = through cut, same rule height as CUT.
4. Slot lines run past the outline on purpose (as drawn) so the slot is cut right through. Keep the overrun.
5. A 0.01 mm stray point inside pattern 03 was removed - it is not a cut.
6. Receiving slits are 0.5 mm longer than the tab neck they take (+0.25 mm each end) - see each sheet.
7. Suggested rule: 2pt centre-bevel, 23.8 mm height (or die maker standard) for leather 1.2-2.0 mm.
8. Optional: dia. 1.5 mm round punch at the closed end of each slit to stop tearing (confirm with designer).

CUT - outline, full-cut rule
SLIT - through-cut slit / slot
Dimension - not cut
